AD MATERIALS

Advertisements must be at least 180 dpi. No bleeds are needed. Preferred format is a print-ready PDF. JPEG or TIFF files are acceptable.

Colors and images used need to be CMYK. Please note: Our presses print in CMYK. Any files that are RGB will be converted to CMYK. This may change the appearance of your color or image.

If using the color black, all black text and backgrounds should be 100% black, not 4-color or rich black.

If using reverse type, type over images or a 4-color background, font should be medium to heavy at 10 point or higher.

Your ad is running on newsprint and not glossy magazine paper. Although the printer will make every attempt to ensure your ad reproduces as designed, it is expected there may be some color variation due to the nature of newsprint media.

FIREBRAND AD BUILD REQUIREMENTS

When submitting your ad materials for your ad build please make sure all images and logos are at least 180 dpi at the size they are to appear on the ad.

Please provide copy, images, logos and layout examples to be used when submitting ad materials for a build.
